INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference P02,0120WO		PLIK PLIK I FIP.K		ation of Transmittal of International Search rm PCT/ISA/220) as well as, where applicable, w.			
International application No. PCT/US03/06853		ternational filing date (day/monte March 2003 (06.03.2003)	h/year)	(Earliest) Priority Date (day/month/year) 07 March 2002 (07.03.2002)			
Applicant HONEYWELL INC.							
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of							
Basis of the Report a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.							
the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)). b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international search was carried out on the basis of the sequence listing:							
· =		pplication in written form.					
	filed together with the international application in computer readable form.						
ı ==	furnished subsequently to this Authority in written form.						
1 ==	furnished subsequently to this Authority in computer readable form.						
the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.							
the statemen	the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.						
2. Certain clai	Certain claims were found unsearchable (See Box I).						
	Unity of invention is lacking (See Box II).						
4. With regard to the title, the text is approved as submitted by the applicant.							
1 =	-		M.C.				
the text has	been established o	y this Authority to read as follo	ws.				
5. With regard to the a	5. With regard to the abstract,						
	-	ted by the applicant.					
the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. T within one month from the date of mailing of this international search report, submit comments to the							
6. The figure of the dr	awings to be publ	ished with the abstract is Figure	No. 2				
as suggester	d by the applicant.			None of the figures			
because the	because the applicant failed to suggest a figure.						
because this figure better characterizes the invention.

Box III TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)

BOX III TEXT OF THE ABSTRACT (Continuation of item 5 of the first sneet)								
An interaction design system [12] may be used by a designer to design a user interface. The designer supplies the interaction design system with a domain model [22] that contains information characterizing and application in a domain, a user model [24] that contains information characterizing the users of the user interface, a task model [26] that contains task primitives to be performed between the user and the user interface and the type of information required by the task primitives, and a device model [28] that contains information characterizing the interaction delivery devices that are available to deliver the user interface. The interaction design system [12] then matches the interaction delivery devices in the device model [28] to the type of information required by the task primitives and to the information characterizing the users, matches presentation objects [30] to the task primitives and to the information of the domain model [22], and generates the user interface based on the matches [32].
